SUMMARY

Software Developer with hands-on experience designing and shipping 3+ scalable web applications using React.js, Java, PHP, Node.js, and MySQL. Skilled in building RESTful APIs, real-time systems with Socket.io, and responsive, user-friendly interfaces. Strong foundation in object-oriented programming, relational database design, and performance optimization, with a track record of collaborating effectively in team settings to deliver working software under deadline pressure.

EXPERIENCE

Kiran Academy — Java Developer Intern *Jun 2025– Jul 2025*

Pune, India

- Developed and maintained backend modules using Core Java, JDBC, and MySQL, and optimized SQL queries to improve application response time
- Applied object-oriented design principles (encapsulation, inheritance, modular class structures) to improve code readability, reusability, and scalability
- Debugged and resolved backend issues by tracing logic across JDBC connections and Java service layers
- Collaborated closely with senior developers and peers in a fast-paced environment, meeting sprint deadlines through clear communication and task ownership

PROJECTS

Farmer Assist — Full-Stack Web Platform *2025*

- Built a web platform delivering crop recommendations and real-time agricultural updates to help farmers make informed planting decisions
- Designed and implemented secure user authentication and an intuitive, role-based dashboard to improve usability for non-technical users
- Engineered backend logic in PHP with a normalized MySQL schema, paired with a responsive HTML/CSS/JavaScript frontend

Relief Connect — Disaster Assistance Platform *2025*

- Designed a real-time coordination platform connecting affected users with volunteers during emergencies, reducing response delays
- Implemented live chat and instant emergency reporting using React.js and Socket.io for low-latency, bidirectional communication
- Built an admin dashboard with multi-role access control (user, volunteer, admin), architected for scalable, concurrent real-time data exchange across sessions

Employee Management System *2024*

- Built a full-stack web application to manage employee records end-to-end, including create, read, update, and delete (CRUD) operations
- Implemented an authentication-protected admin panel to restrict sensitive operations to authorized users only
- Designed a responsive dashboard using HTML, CSS, and JavaScript, backed by PHP and MySQL for secure, reliable data handling

SKILLS

Languages: Java, JavaScript, SQL

Frontend: HTML, CSS, React.js

Backend: PHP, Node.js, JDBC

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Firebase

EDUCATION

Shivaji University — B.Tech, Computer Science & Engineering *2021 – 2025*

Dr D Y Patil, Kolhapur, India | CGPA: 7.42

RPD Junior College — HSC *2021*

78.15%

Milagris High School — SSC *2019*

77%
